# YOUR GIFT HELPS US KEEP SAFE WATER WHERE IT BELONGS: OUR COMMUNITIES.

Your gift supports grassroots movements to defend water sources and supplies from threats like data centers, fracking, power plants, PFAS, and privatization. Let's treat water like the precious resource that it is.

Give today at [cwfnc.org/donate](http://cwfnc.org/donate)

## THANK YOU!

Use the envelope inside  
or give online at  
[cwfnc.org/donate](http://cwfnc.org/donate)

Help us advance  
environmental justice in NC,  
give today!

Whether its fighting for drinking water after a disaster or empowering communities in the face of dirty industries, CWFNC is there. **Because of you.**

Your gift lets Clean Water for NC stand with communities who want to fight for justice, no matter the odds.

CODE

Want to get involved to help counter collapsing federal support for our safety, environment and climate? Visit our website at [cwfnc.org](http://cwfnc.org) to stay informed, read our latest blog updates on county-level issues, sign-up to volunteer, and find ways to take action in your community.

# LOCAL BREAKTHROUGHS ON ENERGY JUSTICE

Duke wants to build even more new gas and nuclear powerplants, at the expense of customers. **A major driver of these proposals is new AI data centers.**

**Lee County:** Proposed fracking for a data center; we're helping the community push for a data center and crypto-mining moratorium fight against gas power plants.

Lee County **SHOWED UP** on March 16<sup>th</sup> and sent a strong message to Lee County Commissioners, to draft language for a moratorium on data centers AND fracking.

**Person County:** Microsoft is driving ahead with a hyperscale data center planning. We're helping community members demand answers and transparency from the County commissioners and Microsoft. In a win for transparency, county leaders finally admitted the 1,300 acres of land would be used for a data center after the community pushed back.

**Davidson:** Duke Energy is currently studying Davidson County for a roughly 1,396-megawatt gas power plant. We're pushing back in the fight against gas power plants.

## YOUR MEMBERSHIP RENEWAL SUPPORTS THE GRASSROOTS ORGANIZING WE NEED, NOW MORE THAN EVER.

Clean Water for NC has been working alongside communities to respond to new threats like data centers, fracking, powerplants, PFAS, & privatization.

Renewing your membership ensures we can continue showing up where decisions are being made—and where people need support. It would also enable us to expand our organizing work through hiring an additional staff member.

## STOKES COUNTY DATA CENTER:

Despite strong resistance from the Walnut Cove community and Stokes County, the Stokes County commissioners voted to approve rezoning for a 1,800-acre data center. However, we're still engaging with the Stokes community to maintain momentum through monthly community meetings to share updates and action steps community members can take, about the data center and other potential development. A lawsuit has been filed challenging this rezoning.

Jan 12<sup>th</sup> Stokes Board of Commissioners meeting, where they approved the data center rezoning in a vote of 3-2. The Stokes Community showed up in high attendance! (200!)

Your gift makes  
the difference.

or visit: [cwfnc.org/donate](https://www.cwfnc.org/donate)

## THANK YOU FOR STANDING WITH US

Whether you take an action or make a donation, your support is essential to winning fights for environmental justice.

Your gift gives CWFNC the capacity to support community struggles against injustice, **no matter who is polluting or who the decision makers are.**
